**Full Description:** Pear Halves in Light Syrup are pears that are peeled with cores and stems removed, cut longitudinally from stem to calyx into approximate halves packed in light syrup. The product is packed in hermetically sealed containers and sufficiently processed by heat to assure preservation.

### Quality Characteristics:

<b>Style</b>	Halves – Peeled pears with cores and stems removed, cut longitudinally from stem to calyx into approximate halves.
<b>Quality</b>	Must meet USDA Grade B; Must comply with USDA Standards for grades of Canned Pears, with modifications noted within these specifications.
<b>Color</b>	Shall possess a characteristic reasonably uniform color that is typical light yellow-white or light beige-white color for properly processed canned pears.
<b>Size</b>	Units to be reasonably uniform in size and symmetry. The weight of the largest full size unit not to exceed the weigh of the smallest full size unit by more than 75 percent.
<b>Character</b>	Units shall possess a texture typical of properly and uniformly ripened pears. The texture is fleshy and free from noticeable graininess or toughness. Units may possess a texture of moderate graininess but not marked graininess. The units are tender, intact, pliable, but firm enough to possess well-defined edges.
<b>Defects</b>	Shall be reasonably free from any defect that may affect the appearance or edibility of the product no more than slightly. No serious trim.

### Physical Characteristics:

Seneca Foods Corporation produces our products to meet a target specification at the time of production. Due to the nature of our commodity products, there are factors such as product maturity, variety, moisture level, and the growing conditions of each particular field which may cause a deviation from the target specification as the product cycles through the shelf life.
